Objective

Enthusiastic and motivated Computer Science student with a solid foundation in Python and web development. Eager to apply my skills in a practical environment, contribute to team goals, and grow in a Python-based role.

Education

BSc in Computer Science and Engineering
Sylhet Engineering College, Sylhet, Bangladesh
Expected Graduation: May 2026
CGPA: 3.80 (after 5th semester)

Technical Skills

- **Programming Languages:** Python, C/C++
 - **Web Design:** HTML, CSS (Bootstrap), JavaScript
 - **ML / DL:** Python Library like Numpy, Pandas, Matplotlib, Sci-kit Learn, TensorFlow
 - **Other Tools:** Git & GitHub, VS Code, Jupyter Notebook, Google Colab
-

Projects

1. Personal Portfolio Website ([link](#))

Built a responsive portfolio site using HTML, CSS, Bootstrap, and JavaScript to showcase personal projects and contact info.

2. Basic Python Programs

Created basic Python scripts involving conditionals, loops, functions, oop and file handling.

3. Cash-out Calculator ([link](#))

Created this project to solve a problem of daily life. This calculator can find the maximum value that you can cashout from your current balance in mobile banking system.

4. Practice Project

Developed several basic front-end projects to practice and strengthen my front-end development skills.

- Security Company Front-end Design ([link](#))
-

Extra-Curricular Activities

- Active member of Programming Club at Sylhet Engineering College
 - Participated in intra-university programming contests
-

Languages:

- Bangla, English (Intermediate)
